We only suggest the highest quality of supplement and have found Nature's Sunshine products to be excellent. We're proud to be an Independent Distributor of their fine products.

NSF International, a non-profit, non-governmental organization and third-party auditor of companies involved in the health and public safety sectors, presented Nature's Sunshine with the NSF Good Manufacturing Certification. This certification means Nature's Sunshine passed an extensive audit by NSF staff, including an examination of production equipment and a thorough evaluation of policies, procedures and manufacturing processes.

600 Tests to Guarantee Quality

Raw materials and finished products undergo more testing than other companies'. Tests include: Microbiological, Anaerobic, Organoleptic ID, Microscopy, Thin Layer Chromatography (TLC), Infrared Spectroscopy (FTIR), High Performance Liquid Chromatography, Ash, Acid Insoluble, Gamma Counter, Gas Chromatography/Mass Spectrometry, Dissolution, Disintegration, Salmonella poisoning, aflatoxins, and many more.

Experience

When it comes to making quality products that yield results, there is no substitute for success. With over 35 years of experience, no company in the health supplement industry works harder to provide quality products. Nature's Sunshine is proud of their team of scientists, each chosen for their specific knowledge of product research, development and quality control. With Nature's Sunshine you can be sure you're getting the highest-quality, best-formulated products available.

Nature's Sunshine scientists work with top researchers at renowned universities to study and test all products and their active constituents.

Technology

Nature's Sunshine meets or exceeds current government Good Manufacturing Practices and pharmaceutical quality standards. The 250,000+ square-foot facility includes a climate-controlled warehouse and cutting-edge laboratory equipment. This allows them to manufacture consistently high-quality products for customers all over the world.
